

## Side-by-Side Comparison

### RAIZR vs Gecko – Which is Right for You?

Feature / Benefit	RAIZR	Gecko
Primary Function	Modular, scaffold mounted material lift	Extending ladder that converts to a material lift
Setup Time	Under 3 minutes	Under 2 minutes to switch modes
Portability	Fits in one of the corners of your van	Transports like a pro ladder
Lift Drive	Cordless drill-powered winch	Cordless drill-powered winch
Max Lifting Height	14m	6.5 – 9.2m depending on model
Max Load Capacity	75 kg	125 kg (torque-limited)
Lifting Speed	15 m/min	15 m/min
Use Cases	Frequent lifting alongside scaffolding	Mixed climbing and lifting tasks, jobs without scaffold access
Assembly	Click-and-play aluminum mast profiles	Standard ladder setup with add-on guidance extensions
Best For	Contractors who need a dedicated portable lift system	Tradespeople who want one tool for climbing and lifting

---

#### Tip:

- **Choose RAIZR** if you need a **dedicated, ultra-portable lift** to use alongside scaffolding all day.
- **Choose Gecko** if you want a **ladder and lift in one** for flexible job-site tasks.

Both Raizr and Gecko are so easy to transport, to set-up and to take-apart that you don't have to leave them behind. Take them with you whenever and wherever you go. You may need them!
